Profile

Hello,

My name is Alex, and I am currently employed at Interchange Outer East as an IT Systems Administrator. I am seeking permanent employment in software development. I have been programming and designing software systems and ideas across a range of projects since 2012. I received formal IT accreditation in 2024 via a Diploma In Information Technology at the University of New England, NSW. Of my 5 classes taken at UNE, I received 4 high distinctions and 1 distinction (testamur available on request).

I consider my code to be clean, robust, creative, scalable, and importantly I take pride in good documentation, clear comments and readability.

You can find my portfolio of previous works, and more about me via the website I am currently making at hourstomax.com/author. I look forward to speaking with you about all things software and code.

Availability

Currently available for up to 40 hours per week across 4-5 days.

Please note, I am unavailable on Wednesdays (negotiable), though I am flexible and available all other days of the week including weekends.

Experience

IT Systems Administrator

Interchange Outer East

October 2019 – Present

Melbourne

Currently performing systems administration for Interchange Outer East in a cloud-based Microsoft Azure/Windows 2016 server environment.

The role involves:

- Supporting the Windows Server environment and operations for staff
- Development and implementation of code-based Microsoft Powerapps systems to provide business solutions
- Helpdesk based IT support for 130 other staff members
- Equipment and device management
- Collaboration with a Managed Service Provider.

Minecraft Bedrock Add-On Project Lead

Echo Games

October 2019 – 2020

Remote

With unique and engaging ideas, Echo games explored the limits of Minecraft Bedrock Add-On system to develop custom mini-games from scratch for Microsoft's Bedrock Marketplace. Echo Games was created by me to produce ready-to-submit maps under contract for GOE:Craft (including modelling, animation, Json, Javascript, MCfunction code, and marketing materials) .

Disability Support Officer

Interchange Outer East and Scope Australia

October 2015 – October 2019

Melbourne

Supporting people with a disability to live and experience the world in their own way. Through day-to-day care and 1:1 support, I worked with a range of individuals to aid in helping them to be involved in opportunities and programs including community advocacy, conferences, and multiple types of supportive therapies (physiotherapy, music therapy, speech therapy).

Ruby On Rails Software Developer

360 Web-front Gears

2014-2015

Melbourne

Developing software for 360 Web-front Gears using Ruby On Rails (Ruby, Rails, HTML, CSS, SQL). Working as a team to think creatively and logically to design, build and code MVC based business solutions for organizations across the Eastern Suburbs of Melbourne.

Education and Training

2024 Diploma In Information Technology

- University of New England, Nsw

2011 Victorian Certificate of Education

- Maranatha College, Endeavour Hills, Vic
